

3way Suction Wand+Int.FloatSwitch-450mm

In kitchens or other places where dosing equipment is used, it is often busy. You don't want to have to keep checking the supply of liquids, do you? With the suction wand, you no longer have to worry about the amount of liquid. When the liquid is almost empty, you will receive a notification. You replace the liquid and can continue. This way you don't have to constantly check the quantity of available liquid yourself. Also check out the buzzer (sound signal) that you need for this
