

Collection pan 8 liters plastic white

Product sheet

The collection pan 8 liters plastic white is a practical replacement part for various sanitary applications. With this collection pan, you can easily replace a damaged or worn pan, allowing the dispenser or waste solution to function optimally again. The collection pan is made from durable plastic and comes in a neutral white color. With a capacity of 8 liters, the pan provides sufficient capacity for daily use in sanitary facilities, offices, care institutions, schools and other public buildings. By replacing only the collection pan instead of the entire system, you achieve a cost-effective solution and extend the lifespan of your existing installation. This makes the collection pan a practical choice for professional facility management.
