

Waste Bin 23 Litre Swing White, PQSA23

Product sheet

In sanitary and medical rooms, hygiene is crucial. The challenge: how do you keep the room acceptably clean during use? A waste bin is one of the basic requirements. With the plastic waste bin from PlastiQline, you have a good solution. With a capacity of 23 litres, this is a modest waste bin. But thought has gone into it: the convenient swing lid always closes the bin. This increases hygiene and looks more professional. You'd rather see a lid than your predecessor's waste
