

Waste Bin 8 Liter Knee Operation Plastic White, PQQBS

Product sheet

In hospitals or care facilities, hygiene plays an essential role. The transmission of bacteria must be prevented at all costs. With the PlastiQline plastic waste bin, which is fully operable with the knee, you prevent unwanted hygienic contamination. The operation is simple: the hinged lid opens as soon as the lower container is pushed with the knee. When the waste has been disposed of and the lower container is released, the lid closes automatically. If you value
