

DC Mix Cabinet for max. 2,5 litre can

DC Mix Cabinet for max. 2,5 litre can, CabinetR

Safety is a top priority for the storage and use of high concentrate cleaning agents. When using a Dosing Care cabinet you are ensured of optimal safety, without the risk of overdosage. This cabinet is suitable for storing a 2.5 litre max. tin of cleaning agent or high concentrate. The concentrate is sucked from the tin by the DC Mix dosing system in such a way that only the perfect amount of cleaning agent will end up in the bucket, sink or bottle, together with the right amount of water. This prevents overdosage and the waste of chemicals and water. The cabinet can be supplied with an access pin code to ensure that only those that are authorised can use the system. If safety is a top priority for you, opt for the Dosing Care Cabinet for a tin of 2.5 litres max. Request a quote here!
