

DC Mix Low Flow

Dosing pump 4,5 litre p/minute, DC Mix Low Flow

Reusing the same spray bottle will decrease packaging waste which is good for the environment and to reduce your waste flows. With the Dosing Care Mix Low Flow you can refill spray and regular bottles in a simple, safe and environmentally friendly way. The Dosing Care Mix Low Flow is designed especially for the refilling of spray and regular bottles. The system is provided with a cleverly designed attachment on which to place the relevant bottle. The low pressure (low flow) at which the cleaning detergent and water enter into the bottle will prevent overdosage and ensures a controlled detergent flow. The DC Mix Low Flow is easy to install and is connected directly to your water pipe. If the environment is important to you, choose for the DC Mix Low Flow (Bottle) 4,5 litres p/min. Technical description

DC Mix is a proportionner. Connected to mains water, it creates a vacuum and dilutes a pre-determined ratio of chemical into a final solution, ready to use. Requires mains water connection with pressure between 1.5 and 5 bar (20 and 70 PSI). With shelf for the bottle. Simple push operation, with lock-on feature for the filling of larger receptacles. Excluding cabinet. The low flow version doses 4 litre p/minute. Dilution rate: 2:1 - 128:1

Specificaties

Article number	5812
Material	Plastic (White)
H x W x D	350 mm x 92 mm x 95 mm (125 mm incl. push button)
Weight	0,7 kg
Guarantee	2 years from the date of purchase
Application	Water mains
Characteristics	Manual
