

DC Mix High Flow

Dosing pump 13 litre p/minute, DC Mix High Flow

Working with chemicals of highly concentrated cleaning agents can sometimes be risky. This is why safety was a top priority in the design of the Dosing Care thinning and dosing systems. Each Dosing Care dosing system meets the highest safety and quality requirements of the hygiene sector. This is why the Dosing Care Mix Highflow only doses that amount of cleaning agent to the bucket, bottle or sink set by you. The system can be connected directly to the water pipe, making it easy to install. The Mix Highflow is operated with a push-button that can be locked when filling up larger reservoirs. The fast flow enables the Highflow to dose 13 litres per minute. If you think that the Dosing Care Mix Highflow could do well within your business, request a quote here.

Technical description

DC Mix is a proportionner. Connected to mains water, it creates a vacuum and dilutes a pre-determined ratio of chemical into a final solution, ready to use. Requires mains water connection with pressure between 1.5 and 5 bar (20 and 70 PSI). Simple push operation, with lock-on feature for the filling of larger receptacles. Excluding cabinet. The high flow version doses 13 litre p/minute. Dilution rate: 6:1 - 350:1

Specificaties

Article number	5815
Material	Plastic (White)
H x W x D	350 mm x 170 mm x 95 mm (125 mm incl. push button)
Weight	0,7 kg
Guarantee	2 years from the date of purchase
Application	Water mains
Characteristics	Manual
