

DC Multi High Flow

Dosing pump 14 litre p/minute, DC Multi High Flow

Working with chemicals can be quite risky at times. You would prefer to avoid these risks as far as possible. When using the DC Multi High Flow dosing pump you can be sure that your cleaning agents are processed in a safe, sustainable and smart manner. Add your chemicals to your bucket, sink or bottle in a safe and sustainable way by using the DC Multi High Flow. The green ring will help you set the right dose of chemicals in advance. These chemicals can be sucked up from four different bottles. The dosing pump will ensure the ultimate mix for an optimal cleaning result. The chemicals are stored safely within the dosing pump so any risky contact is avoided. Can be connected directly to the water pipe. Do you value a safe and sustainable use of chemicals? Then request a quote for the Dosing Care Multi High Flow now.
